Thank you for your interest in Inspiration Mutz Designs.

It is important that you know Inspiration Mutz Designs are digitised with Bernina software. If you work in a different (converted) format you might have different colors displayed on your system. This is due to the software in your format using its defaulted colors.

All colors listed for you are guidelines only – you are welcome to exchange them with colors matching your own project ideas.

A word about jump stitches: I do try to avoid jump stitches as good as I can – but there can be areas in a design where a jump (and clip) is better than a travelling stitch. So please clip jumps as your design stitches. There are not many, though.

Best effects are achieved when stitching this design on a lighter color background, i.e. beige or soft brown for a more “bear-like” character since this is a design with lines only (no fill) in certain areas.
