

# Instructions for the Velvet Technique

- 1) Stabilise your article very good, the flowers of the designs are very dense
- 2) Stitch the designs. You will notice that it stitch the satin for the flowers twice but in different colours.
- 3) When you are done take your hoop out of the machine, unhoop and remove all the stabiliser.
- 4) ON THE RIGHT SIDE take a sharp point scissor or a un picker and cut ONLY the flower petals through both layers of the satin stitches. Take care not to cut the step stitches underneath the satin stitches. This will reveal the colours underneath and give a velvet look to the flowers.

5)
