

Helpful Hints for Jumbo Hoop designs

by Loronda Schuler

Heav'n Sent Creations

Depending upon the machine that you use to sew out your jumbo designs, you may find that some of the large hoops do not hold the fabric tight along the longer edges.

I have found it helpful to overlap the fabric up and over the hoop and pin the fabric to the fabric inside fabric. Make sure you pin it very close to the hoop so that it is not in the actual sewing area. When you are using the Babylock or Brother machines where the design is split and you turn the hoop, pinning the fabric will help to avoid the fabric pulling in on the design side. When it pulls in the design will not light up correctly.
