

EO 262. A Portrait of Santa Ornament instructions:

For the reg. photostitch patterns in this set please follow the instructions above for all photostitch patterns.

The instructions for the ornaments are as follows

Colours

1 Background - White

2 Dark - black

3 Med - grey or Sulky's toast

4 Skin - light peach

5 Light and border - metallic silver

The Metallic silver really gives a sparkle to the design.

Very important..... snip the jumps between each colour and when pattern is complete snip the back long stitches too. You want the pattern to be as clean as possible on the back so the threads won't show when hanging on the tree.

Hoop instructions

2 layers of wash away stabilizer

1 layer of white organza or 2 layers of Bridal Tulle

*When sewn out, gently wash the wash-away stabilizer in hot water
Lay out washed designs flat to dry.*

When dry press on medium heat setting on iron

If desired you can sew beading around the border and on the Santa costume to have an extra shine. I will be using Rochelle beads and string pearls when I can get them done.

Hang the ornaments on the tree in front of a Christmas tree light

The set has 15 4x4 patterns as well as the same 15 patterns with a hanger hole at the top for ornaments.

There is also a free pattern giving the set a total of 16 different patterns but 32 patterns in the set.

I will be completing the 5x7 set soon but I think they would be far too big for ornaments. Those patterns will be sewn out on any fabric of your choice.
