

JHB436freebie

Thank you so much for downloading this freebie. Enjoy using it to brighten up your project!

Hoop up your fabric with some tear away stabilizer and stitch.

Thread colours are totally up to you. First will stitch the leaves of the plant, then the flower and then the inside of the flower. After the flower comes the butterfly. First the bottom wings of the butterfly, then the top wings and then the body. After the body the decorative swirl.

TIP – I find where there are a lot of small stitches, you get a nicer end result if you match your top and bobbin thread.

Enjoy and have fun with it!

Kind regards
Helena
