

ANS075 - Instructions for the Love Coaster 03

(<https://www.oregonpatchworks.com/embroidery/collection/ANS>) and distributed by www.oregonpatchworks.com

Hoop size: 4x4.

Please Note:

Colour changes for the adding of the backing pieces are just to force the machine to stop.

Materials required for each item:

1. Tear away stabilizer.
2. Fabric for the front piece. The design will be stitched on this fabric.
3. Fabric for the back piece – no design will be stitched on this.
4. Masking tape or temporary spray on glue. (I always used the temporary spray on glue)

Coasters

All coasters use the same instructions.

Coaster 3 (4x4 hoop)

Materials Required:

1. Tear away stabilizer.
2. Fabric for the front of the coaster. The design will be stitched on this fabric.
3. Fabric for the back of the coaster – no design will be stitched on this. If you use a pretty fabric for the backing, the coaster can be reversible.
4. Masking tape or temporary spray glue.

Instructions:

1. Stitch the design and words (if applicable).
2. Stitch the candlewick frame if applicable.
3. Change the colour of the top thread to be the same as the finishing satin stitches.
4. Please note, colour changes from here on are only used to force the machine to stop.
5. Stitch the outline of the coaster to show where backing fabric should be placed.
6. Remove the hoop from the machine, BUT DO NOT UNHOOP.
7. Cut a piece of fabric to use for the back of the coaster. It must be at least 1cm larger all around the outline stitch. You can use pretty fabric and that will make the coaster reversible.
8. Use temporary spray on to glue the fabric, wrong side down, to the back of the hoop. Or tape the fabric to the back of the hoop. Make sure the outline stitches are covered.
9. Re-attach the hoop to the machine. The newly attached backing fabric will be under the hoop.
10. Stitch the outline to tack down the backing fabric.
11. Remove the hoop from the machine, BUT DO NOT UNHOOP.
12. Trim the backing as close as possible to the outline tack down stitches.
13. Re-attach the hoop to the machine and finish the satin stitches, stitching the outline of the coaster in satin stitches.
14. Remove the hoop, unhoop, and trim the coaster as close to the satin stitches as possible.

Enjoy!
