

JHB522 design detail

This is a fun set that will enhance any area in your home over the festive season.

The tree is approximately 22 inches (56 cm) tall and 20 inches (51 cm) on its widest point. This is an in the hoop project that is done in panels and gets assembled on your normal sewing machine. The tree is made up of 13 pieces (which includes the star) and the set comes with five free standing ornaments which can be attached where ever you wish on your tree but can also be attached to gifts or even your normal tree.

The panels are quick stitching and easy to make. You can use a different fabric for each panel or use the same fabric for all the panels, choice is totally yours.
