Lace Hearts 2

These designs are free standing. Use your favourite water soluable stabilizer. I have the best results with Vilene. Hoop the stabilizer and embroider the design. It should be hooped „drum tight" – firm but not stiff as a board. When you tap on it there should still be some flexibility otherwise the threads would pull together without being bound properly. It is advisable to slow down the stitching speed. Always use sharp needle to avoid thread breakage. After embroidering the designs, soak them in the water but not too long to keep some stiffness. Motives can be wavy when the stabilizer is gone, just lay them flat on towel or between some fabric and iron thoroughly either when dry or while they are still a little bit damp. There are two versions available in the .zip archive – with an eye for hanging and without it.

Elacehrt08 - 78.10x74.70 mm; 11,435 stitches, 7 colors

1. **White**
2. **Leaf Green**
3. **Green**
4. **Carmine**
